THERMO SOLUTIONS CHAPTER 4

Sep 21, 2020

[Thermo Solutions Chapter 4](#)

Chapter 4: Homework Solution A movable cover is located at the top of an opened metal box. The metal box contains steam at 350 C, and pressure of 2 MPa. Currently the steam is about to be cooled. Determine the compression work for the steam and pressure and its final temperature where the mass of the movable box and metal box is 4kg.

Chapter 4: The First Law of Thermodynamics for Control Volumes The Energy Equation for Control Volumes. In this course we consider three types of Control Volume Systems – Steam Power Plants, Refrigeration Systems, and Aircraft Jet Engines. Fortunately we will be able to separately analyze each component of the system independent of the entire system, which is typically represented as follows:
